30+ Years Experience Interpreting Stellar Events

FOR A PERSONALIZED CONSULTATION CALL JOHN AT 505-489-1122.

ARIES (3/21-4/19) MAY: Your burning truth must be expressed. By the 11th, sad events cause grief. After that you see another's unhappiness.

Two events this month seem crushing one day but uplifting the next. The 11th and 12th are about lost love that brings truth and the other two days are the 29th and 30th. A setback one day turns into a great and unexpected mind cleansing on the 30th. Be careful driving and be ready for great insights this whole month. **JUNE:** The stellar forces are prompting you to focus on the home this month. There's a happy relationship there after the first week. Talking is replaced by doing. Long trips are blocked or ill-advised. Deep research of ancient cultures has an appeal, but do it from home. The 9th brings a change, delightfully to these activities. Don't be discouraged by flabby negativity on the 24th. The next day restores an ideal. A good talk on the 28th can raise your optimism.

TAURUS (4/20-5/20) MAY: You have been slogging too long through the muck of your subconscious. There has been loneliness. The fog will lift as May ends. Love is waiting just off-stage, holding a light for your new path. Since early February, you have wandered amidst endings and deep realizations. The 19th provides an over-abundance of choices. The New Moon on the 25th is not good for anyone to travel, but it also gives you a chance to eliminate financially draining beliefs.

JUNE: Are you tired of self-criticism? Be grateful that your past four months of reconstruction has produced a new and improved Bull-person. One final note on the 1st completes this process. Armed with a wealth of preparedness, you're fully equipped with the knowledge, the compassion, and the energy to burst forth on the 9th as Super-Bull, the Magnificent. Even your health improves. You have learned the art of quiet introspection. Keep using your new powers as a source for good.

GEMINI (5/21-6/21) MAY: Mercury ends 3 weeks of retrograde on the 3rd. Excitement is high from a meet-up with friends on the 9th. Surprise endings on the 11th are positive in nature. The 15th requires a withdrawal to work on a major goal. You can hide, but you cannot run from a passion, which seems to seek you out as the month ends. There is a big change involved here. Write down what you discover this final two weeks for May. It's all good.

JUNE: Things move quickly this month. The 6th will test your reflexes and natural adaptability. The 13th is less than ideal, but hope is restored that very same day. It's a matter of what you choose to focus upon. This internal conflict is highlighted

on the 18th. Fortunately, the 20-28th is active and positive with friends and finances. Something ends on the 28th. Watch for scams that day as secret motives are disguised by twisted logic. The 21st starts your money machine for a month.

CANCER (6/22-7-22) MAY: The Crabs are in a friendly frame of mind as they pursue ambitious dreams. Communications improve as of the 3rd. That works for your life goals and personal standing. The Full Moon on the 10th brings romance, but there is a blip of distraction from that on the 11th. The 12th helps you to call upon your personal religious or philosophical beliefs. Friends lend an ear or a hand after mid-month. You're up for high-energy events the final 2 weeks of May. **JUNE:** The Full Moon of the 9th brings needed energy to bring you out of a slump. It's also a time of good health. The first 3 weeks of June are a time of discovery as hidden matters come to light. It's a time to finish a year-long cycle by working on charitable projects. You can bring great happiness to others. This will boost your joy as well. New beginnings can be scheduled for the 23th. Look before leaping on the 24th. The 25th has inner satisfaction.

LEO (7/23-8/22) MAY: The Sun shines warmly on your house of career and reputation. These parental concerns fill your mind. A smile starts your month and the first 10 days as work and/or passion seems to click. The 10th brings a mysterious Full Moon to add drama. Don't let friends drink and drive on the 11th. The 12th is great to re-create former joyful times. The 18th/19th are excessive. Ancient discoveries add drama. Reality brings changes on the 25th. "Demolition" brings hopefulness the final 10 days. **JUNE:** As the Sun moves happily along through your house of friends, your spirits are lifted. Even alone, you can regurgitate joyful memories. Don't cause trouble for yourself by trying to re-engage with the source of those happy days. Move on, for there is great excitement with new experiences on the 18th. The 20th brings a time of soul searching, discovering hidden truths, hospital visits, and completing year-long projects. Your dreams are significant messages, which only need proper deciphering.

VIRGO (8/23-9/22) MAY: Mercury goes direct on the 3rd and that brings high energy and constructive achievements on the 9th, 10th, and 11th. Travel is a careful consideration after mid-month because some days are better than others. War drums pound, but your sense of logic can calm those tendencies. You can make great personal advances this month, but

there is so much propaganda and strife to deal with. Stay focused and know that the month ends with positive actions.

JUNE: Finances improve this month. You even have a higher opinion of yourself as the month progresses. It is better to be emotionally independent after a dispute on the 13th. The goals you have set include a place of solace and focus if your character is questioned. Doing for yourself means more than what another wants for you. As the Sun moves into your house of friendship and accomplishment on the 20th, you have a chance to move forward in amazing ways for 10 days.

LIBRA (9/23-10/22) MAY: Much of your time is spent tending to the comfort others. Socially, you are a natural butterfly. Jealously with reason, creeps into your relationship near the 19th. Someone from a happy time in your past, now causes upsets. You may attempt to confront an emotional problem at home, but your nature is too gentle to deal with a dark force on the 25th. This becomes an ongoing issue for 3 weeks. You know what you are fighting. Good-luck, peaceful warrior. **JUNE:** Thoughts of home and those pesky parental messages haunt your mind as June begins. The 3rd brings a partner into the picture. They have more words than action. That advice is what you need for this constructive month. Passions are high, but so is your desire to get things done. There is a plan for travel in the works. It would be better to apply that energy to home and education goals. Paint on the 20th and tear down on the 24th.

SCORPIO (10/23-11/22) MAY: Light shines on your partner and your social life. These things seem easy. Maybe, they are too easy for your intensity. While Pluto (the mighty midget) is retrograde, it may be better to use your Mars energy to make needed changes. You may confront a "less than ideal" situation in your romantic life on the 11th. You could be considering a past partner on the 12th. There was a lot of happiness with that arrangement. Love is difficult from the 25-29th, but the final 2 days look hopeful. **JUNE:** Life changes on the 4th. Passions flare on the 9th because some people are irresistible. Add in a Full Moon that day and your desires are inflamed. Happiness can be found in familiar arms, or you could apply that energy to massive money acquisitions. Some Scorps find themselves in a stockpile mode. That can be a good tactic. Your impulse is to combine all of this with your travel urges, however the stars warn not to travel before the 9th. Your needs can be amassed closer to home.

SAGITTARIUS (11/23-12/20) MAY: Your happy planet, Jupiter, is still retrograde all month. It seems difficult to keep a smile. Around the 12th you may want to join another. Let their energy lift your spirit. The 19th has many "goodies" to choose from. Some of these are beneficial, but some are just sour fruit. A friend could drain your energy this whole month. This could be a necessary effort or "evil". Karmically, it is an obligation. Travel will be delayed, but next month is better for that. **JUNE:** Progress returns to the Centaur's life. Friends become more helpful. Your recent preparations are now a source of wealth. All the spiritual truths you have seen are now coming out for all to see. The

final week can be a little rough, but you are tough. There is a Full Moon in your Sign on the 9th, at the same time as your planet Jupiter steps up to all challenges for you. Dust off your dreams this month for they are a horse ready to gallop.

CAPRICORN (12/21-1/19) MAY: Things are slow, so this is the time to explore natural health methods. Most Seagoats are part of a populous that swears by standard medical practices. Just realize that your body is not fully built to handle artificial or man-made medicine. The 9th is a very revealing day. You may seek out new electronics for the home, and rock your core being. A look at your upbringing reveals even more near the 18th. Work and health issues arise again at month's end. **JUNE:** Saturn seems to keep things slow at the shop this month. You are building to a significant event during and after the great August 21st eclipse. Meanwhile, just make preparations for your future plans. Pour "foundations" upon which to build. Your personal karma is always nagging you, and the past few months brings that karma to your doorstep. That sweet person you met to start the month will be a shield of love when others throw stones.

AQUARIUS (1/20-2/18) MAY: This should (or could) be an active month as you thirst for knowledge and travel. Your new direction, which began 6 years ago, is leading you to a new home, and more stability. First, you must finish the path you are on. This final year will bring the peace and happiness your heart desires by June 2018. Meanwhile seek knowledge, take trips, and build friendships this month. Someone older and wiser reappears in a significant way before the 20th. Excitement is high at month's end. **JUNE:** The 3rd feels like love. If that's too weird for you, it could be a nice time for a drive or walk to a new place. If you choose love, you can plant a seed and watch it grow into a gorgeous sunflower near the 18th. Romantic words on the 21st could set off a panic attack because of all that goopy emotional stuff. This is not a time to pull your detachment technique. There is great healing power at hand.

PISCES (2/19-3/20) MAY: The month starts out pleasant like a warm day at the lake. The 3rd can be a very romantic note. Home is a focus the first 3 weeks, even longer for some Fish. Only one glitch on the 11th occurs. That could make your blood boil, but don't let it get you into hot water. You don't need rudeness from others. The 19th can be disturbing, but you can just float along with a song in your head and a drink in your hand. **JUNE:** The month improves, but there is trouble on the 4th. Don't buck authority that day. Wait 'til they're not looking. You might be maligned on the 13th. Most people know you are an angel filled with honey. Kiss them if they doubt that. Neptune turns retrograde on the 16th. There is little difference if your ruling planet is moving forward or backwards. It's just more profound over the next 5 months. Sweet words on the 20th are a prelude to passion during the final week.
